PROFILE

Informatics Engineering Fresh Graduate with internship experience delivering production-ready dashboard and web applications using Next.js, React, TypeScript, and Tailwind CSS. Skilled in building responsive interfaces, integrating REST APIs, implementing secure authentication flows, and developing reusable component architectures. Experienced collaborating in team environments with GitHub workflows and deploying applications using Docker on VPS servers.

EDUCATION

UNIVERSITAS BINA SARANA INFORMATIKA

Bachelor of Informatics Engineering | GPA 3,80

Jakarta, Indonesia

2021 - 2025

SMK BAKTI 17

Computer and Network Engineering

Jakarta, Indonesia

2018 - 2021

EXPERIENCE

Kalayudha Group Indonesia | (Kemnaker / MagangHub Program)

Venture builder developing digital products, healthcare platforms, and tech-driven startup solutions

Jakarta, Indonesia

nov 2025 - mar 2026

Front-End Developer

- Successfully developed responsive admin and client dashboard applications using Next.js, React, TypeScript, and Tailwind CSS for a health screening platform used for operational monitoring and reporting.
- Developed key frontend features including authentication, organization management, analysis management, and MCU upload workflows for a health screening platform..
- Implemented REST API integrations for analytics, reporting, uploads, authentication, and role-based access control to support real-time data management and monitoring.
- Built interactive dashboard visualizations and monitoring components to improve health analysis reporting and overall user experience.
- Developed secure JWT authentication flows with refresh token handling, auto-logout, and protected admin/client routes to enhance application security.
- Created reusable and maintainable UI components such as data tables, stat cards, modals, badges, and loading/error states for scalable frontend architecture.
- Collaborated with backend engineers to integrate signed URL upload workflows, report systems, and cloud storage features.
- Collaborated with team members using GitHub workflows for feature delivery, debugging, and continuous frontend improvements.

Kreasi Aplikasi

Digital platform providing verified company data and business information services.

Jakarta, Indonesia

oct 2024 - jan 2025
